Intellij IDEA Export Jar file
# File → Project Structure
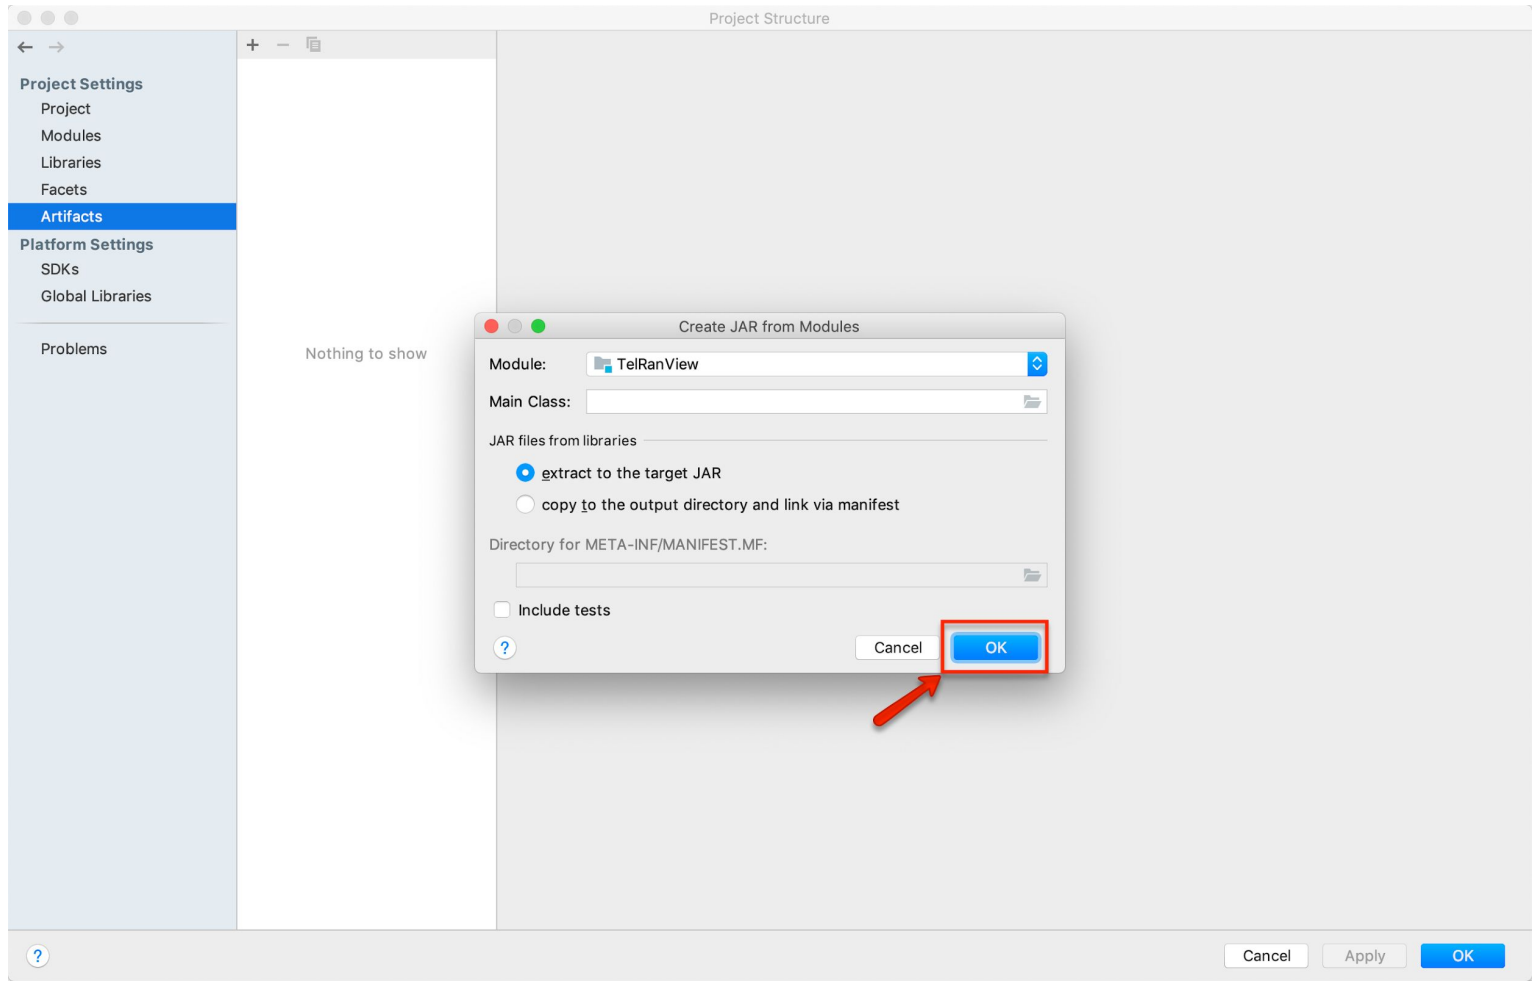

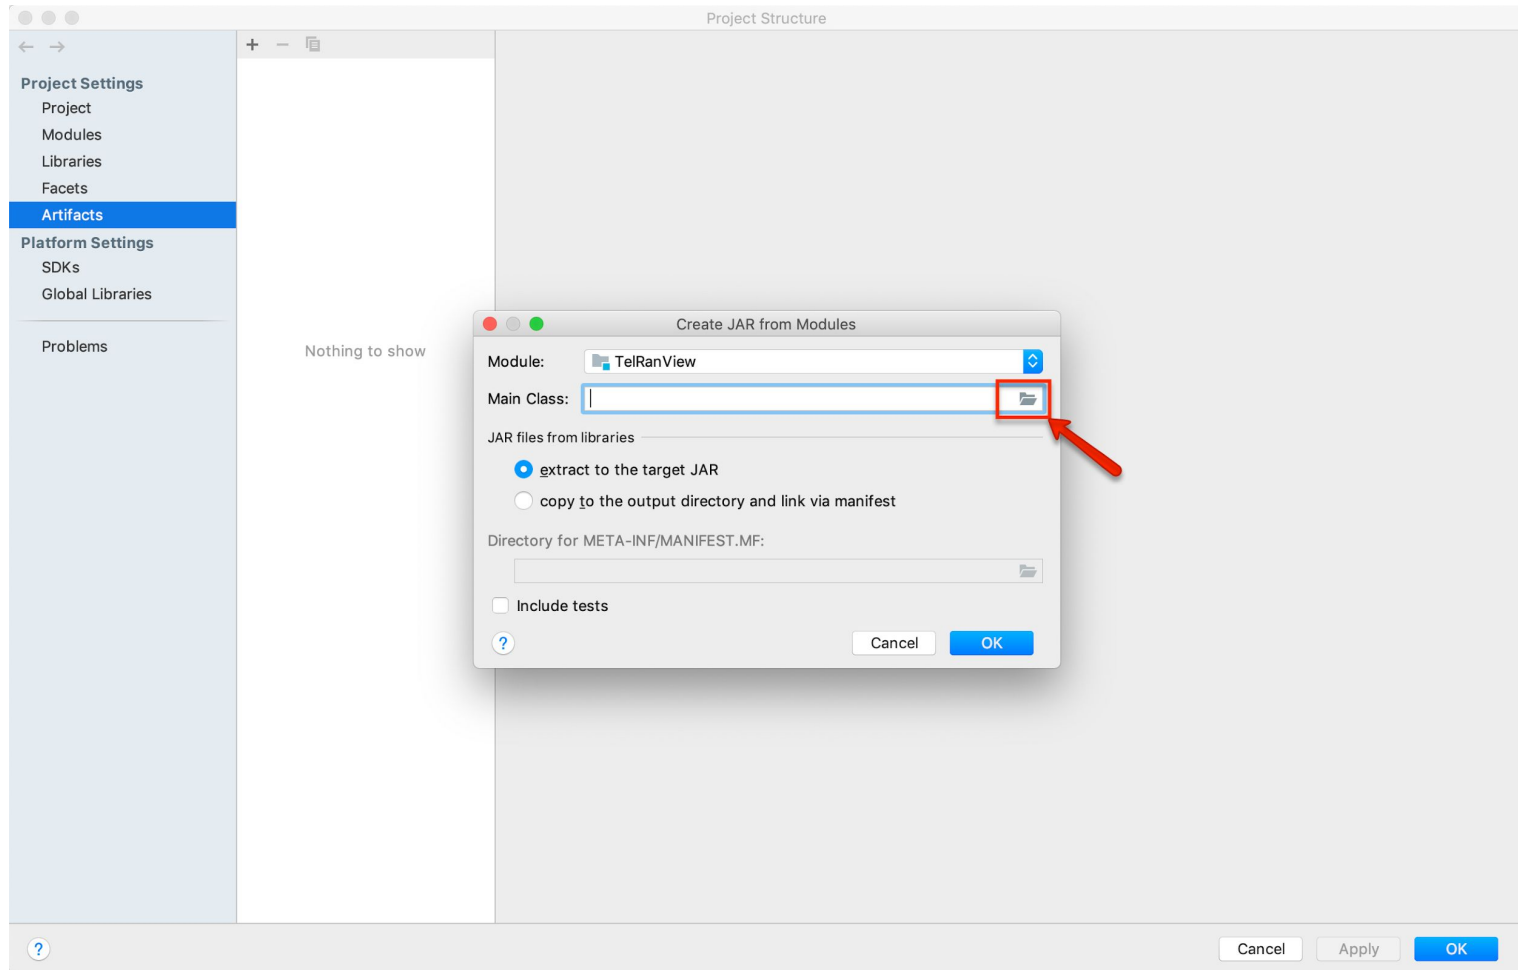

Artifacts

Add(plus) → JAR → **From module with dependencies**
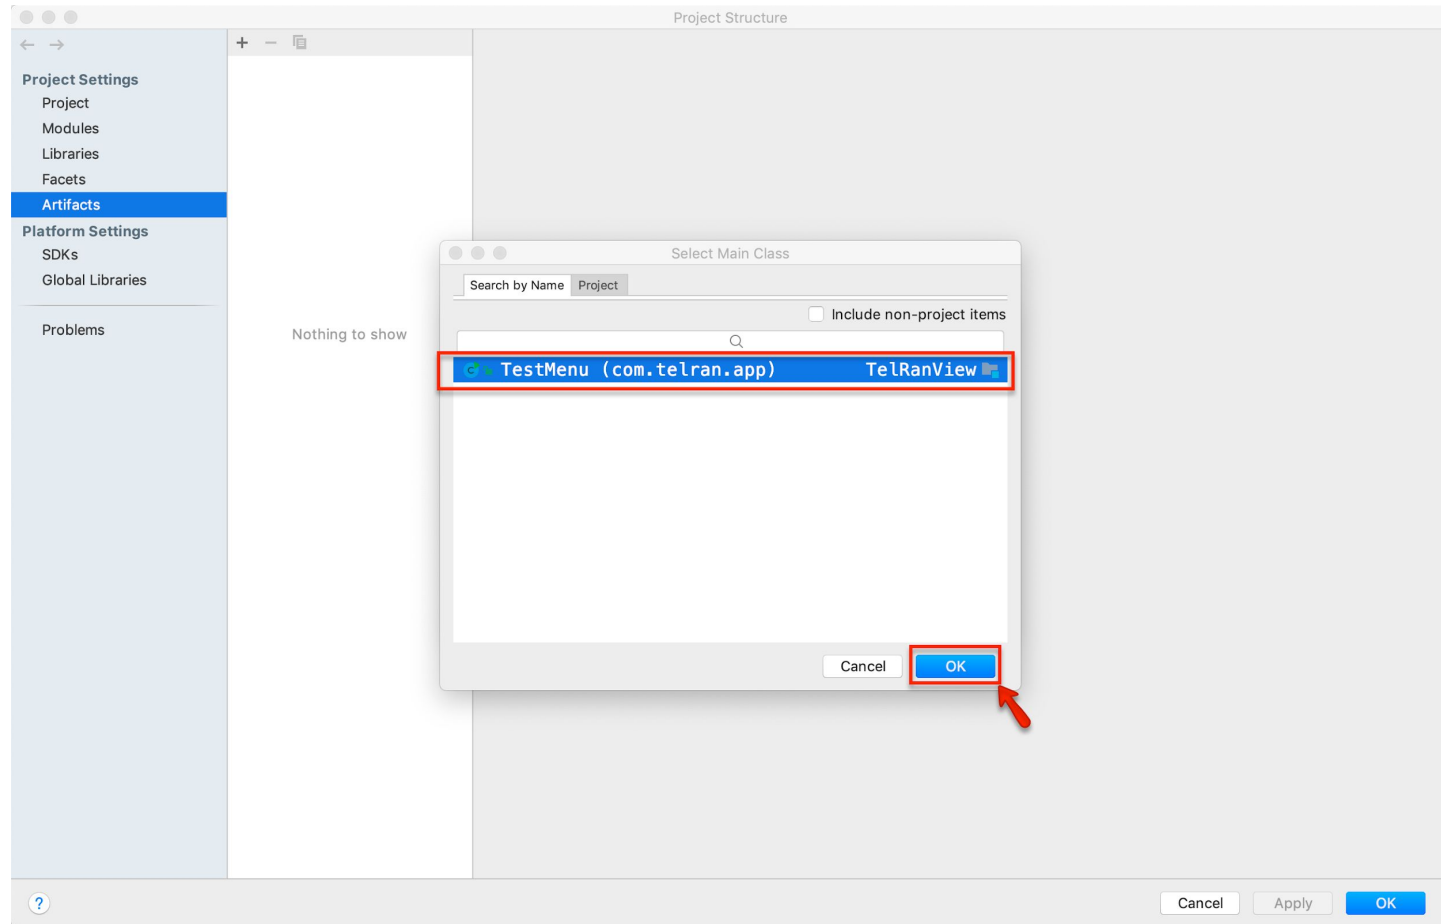

For JAR as library
Click OK

For runnable JAR file
# Select → Main class

For runnable JAR file
Select class with function main → Click OK
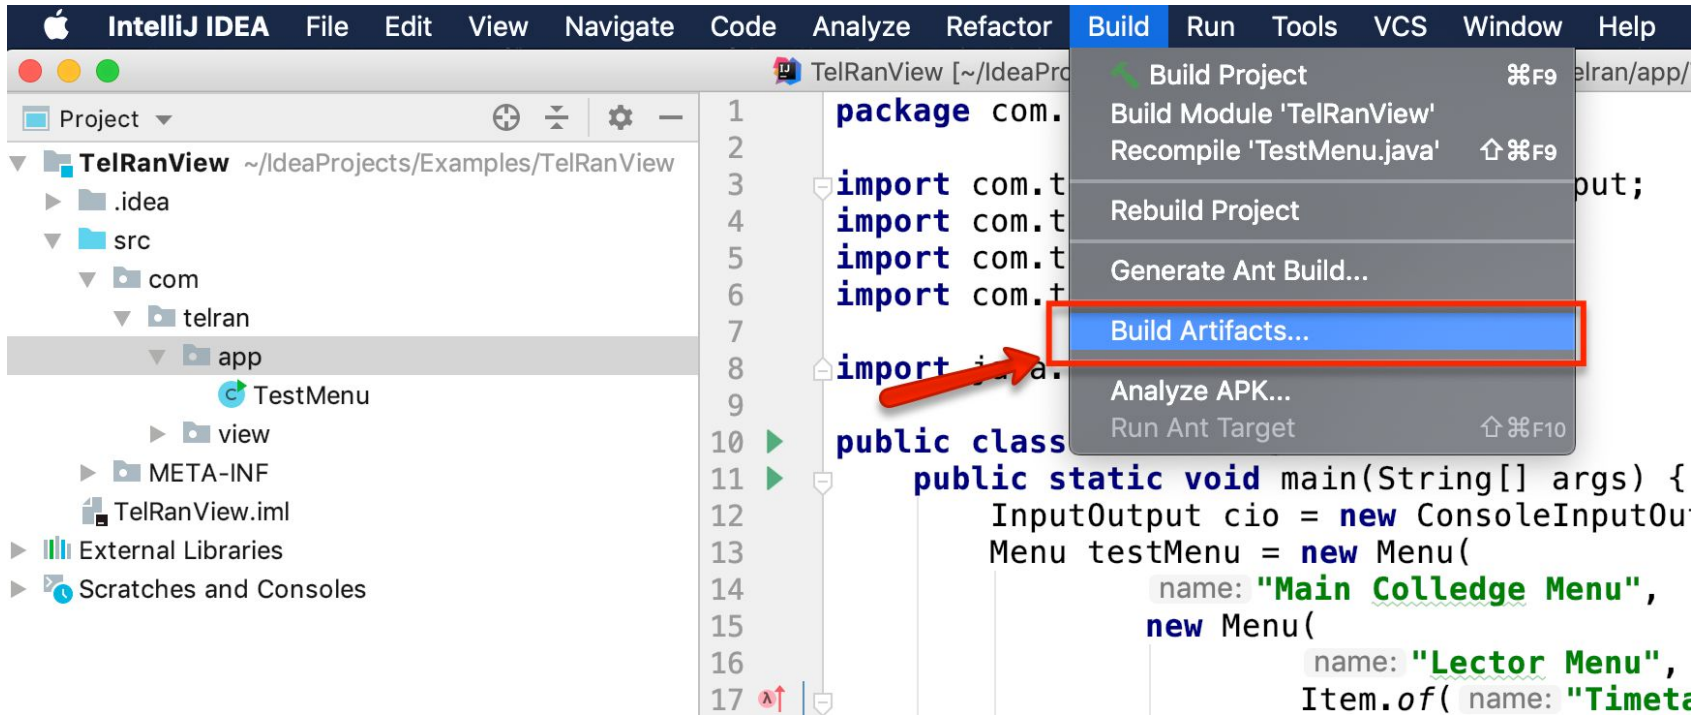

Click OK

Click Apply → Click OK

# Choice Build Artifacts… in Build Menu

Click Build
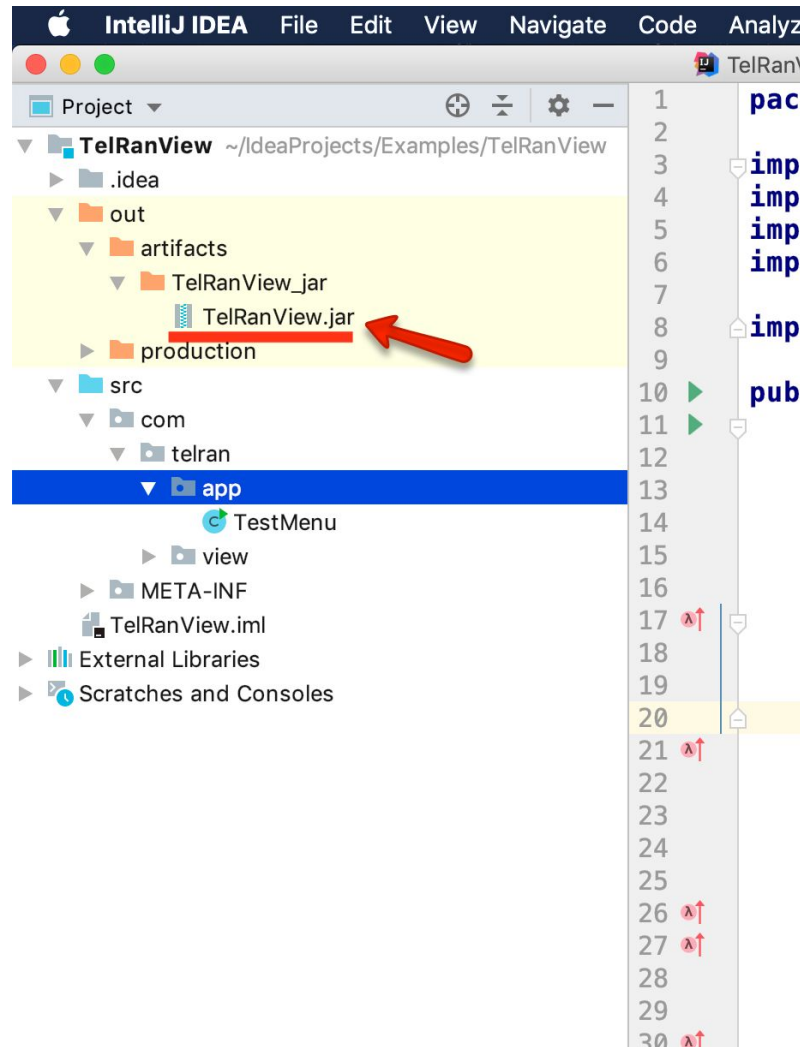

```java
                name: "Lector Menu",
            Item.of( name: "Timetable", io->{
                LocalDate date = io.readDate(
                io.writeln( obj: "Display Timet
            }),
            Item.of( name: "Learning materials
    ),
    new Menu(
            name: "St          ",
        Item.     nam          results", io-
        Item.of( nam      tion payment",
        Item.exit()
    ),
    Item.of( name: "About", io->io.writeln( obj
    Item.exit()
);
    testMenu.perform(cio);
}
```

Build Artifact

TelRanView:jar ►

Action
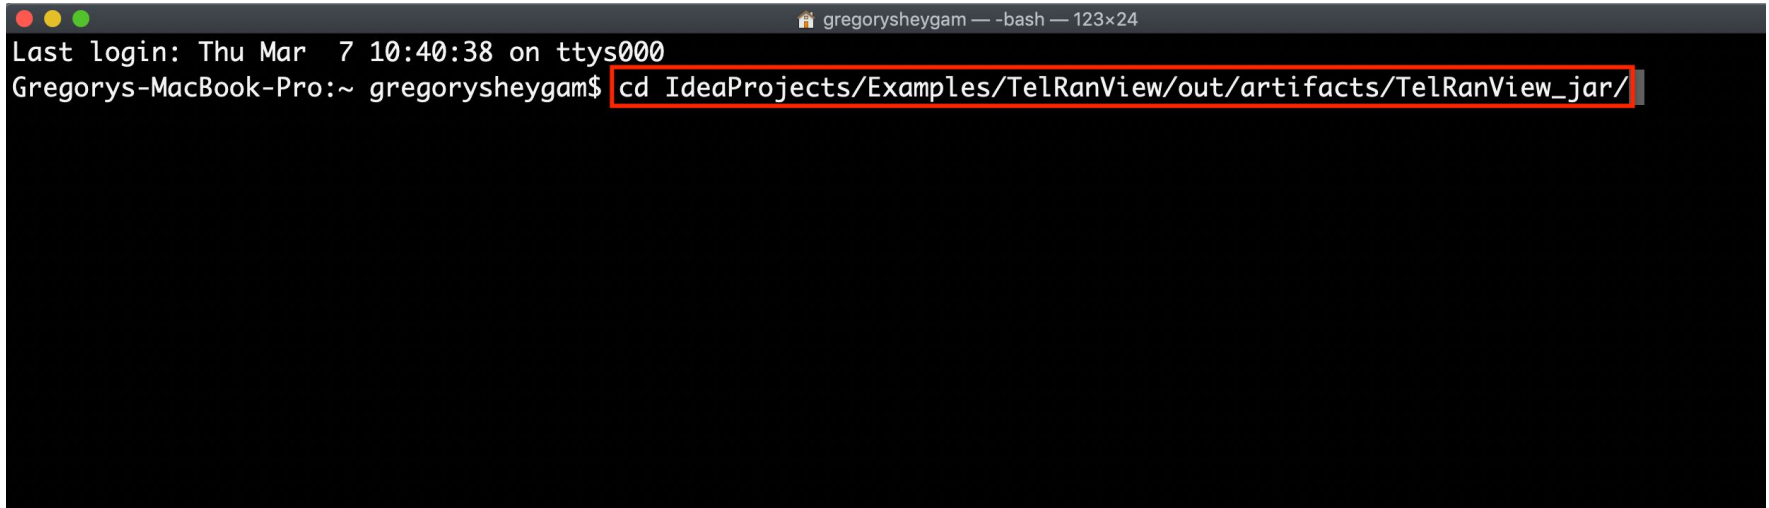

Build

Rebuild

Clean

Edit...

After build you can find .jar file

ProjectFolder → out → artifacts → [ProjectName]_jar → [ProjectName].jar

If you did build runnable JAR
# you can run it from console
Open Terminal (cmd Windows) → go to the folder with the jar-file

```
Last login: Thu Mar  7 10:40:38 on ttys000
Gregorys-MacBook-Pro:~ gregorysheygam$ cd IdeaProjects/Examples/TelRanView/out/artifacts/TelRanView_jar/
```

Run command
java -jar [FileName].jar

Congratulation

```
Last login: Thu Mar  7 10:40:38 on ttys000
Gregorys-MacBook-Pro:~ gregorysheygam$ cd IdeaProjects/Examples/TelRanView/out/artifacts/TelRanView_jar/
Gregorys-MacBook-Pro:TelRanView_jar gregorysheygam$ java -jar TelRanView.jar
